

Company profile: Sport Components AG

Founded in 2015 by 2 cycling enthusiasts, product development engineer Pius Kobler and entrepreneur Sven Rizzotti, Sport Components AG is on track to become a major player in the tubeless cycling market.

milKit is the first product line launched by the Swiss company, simplifying and revolutionizing tubeless installation and maintenance.

Sport Components AG's pipeline features innovative products for the entire bike and sports market.

Facts & Figures

Foundation: 2015

Office: Zurich, Switzerland

Sales channels: Online shops worldwide

Clients: passionate tubeless bikers and those who want to be

Products

milKit compact

In one brilliant move the brand new product milKit compact has simplified the checking and refilling of sealant in tubeless tires, allowing the tires to remain on the rim and the air inside of the tire to thus keep the hands clean. milKit compact consists of two milKit valves with a valve core tool and a measuring and refilling syringe with an applicator tube, all contained inside of the syringe itself.

milKit valve pack

Those who have a second bike don't need a second milKit compact: Sport Components AG has launched the milKit valve pack, including two milKit valves and a valve core tool.
